Developed a comprehensive solution for automating student attendance tracking in laboratories. A command line and web software

**Rust, tailwind, sqlite.**

Won Hackathon

October 2023

Developed “college news and announcements” app In a hackathon and won a consolation prize for making the communication easy by eliminating use of whatsapp.

## Awards

**Google Cybersecurity Professional Certificate**

## Interests

I love low level languages like Rust, C++.

I do UI designing sometimes on figma.

I do character designing on blender sometimes.

I love deploying things to production, once I had a bad time doing that.
